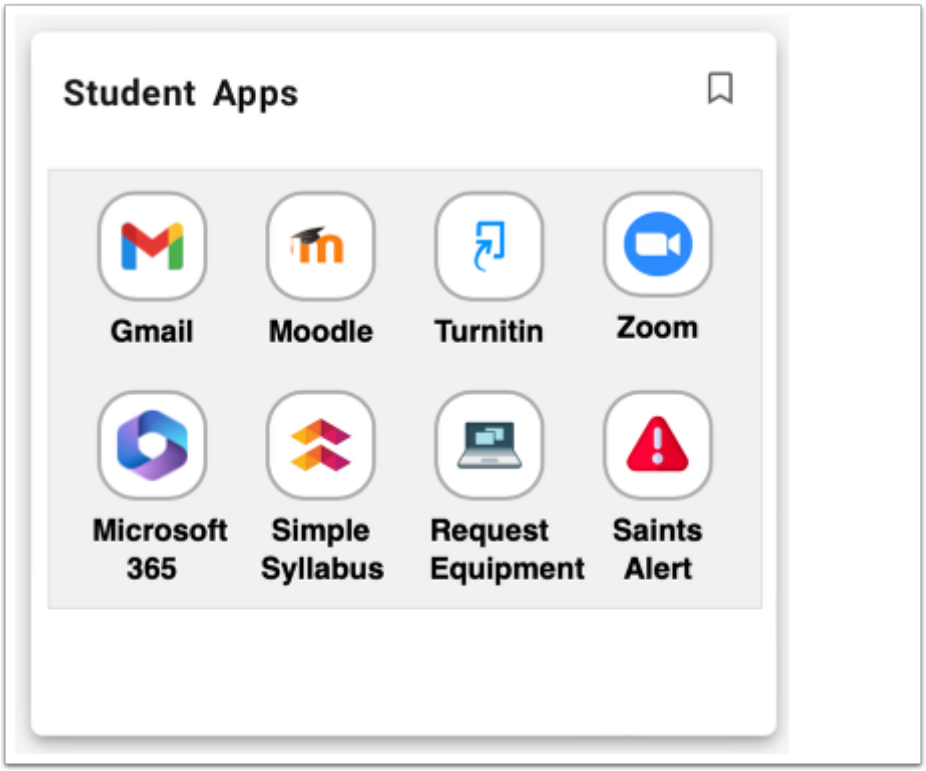
Access Online Resources in mySCC via "Student Apps"

The "Student Apps" card at the top of the mySCC homepage has links to some of the most used digital services.

Most of these links, like **Moodle and Gmail,** automatically log in you in to external service and take you to the service's homepage.

The other links in the Student Apps card includ:

1. Turnitin - a site for submitting your academic work to check it to make sure you are using sources properly.
2. Zoom - the service instructors use for online meetings and class sessions
3. Microsoft 365 - where you can log in and have access to Microsoft Office tools (Word, PowerPoint, etc.)
4. Simple Syllabus - where your instructors will post your course syllabi
5. Request Equipment - The library has laptops, Verizon Jetpacks, and calculators available for checkout. This form will initiate the checkout process.
6. Saints Alert - Sign up and access Saints Alert here to make sure you get text alerts of significant issues at the college -- such as delays due to inclement weather.



These aren't the only services students have access to through mySCC. Be sure to check out the default cards on your mySCC homepage, as well as searching for other cards and services through the "Discover" link in the mySCC main ("hamburger") menu.
